

Avi-Lyte™

for poultry

Product Type: Water Soluble Nutritional Supplement

Product Form: Soluble Granules

Indications for Use: For chickens and turkeys. Administer through drinking water at times of stress including heat stress, following vaccination, during diet changes, after transport, when health challenges arise, and prior to processing.

Product Features:

Acidification

Electrolytes

Beneficial Gut Bacteria

Vitamins

Minerals

Flavor

Product Benefits:

Citric acid lowers the pH of drinking water, and acts as catalyst for electrolyte absorption.

Ideal for heat stress to increase water intake and reduce mortality.

Provides nutrients critical for acid/base balance and helps replace those lost during dehydration.

A blend of bacteria including poultry derived *Lactobacillus acidophilus*, *Streptococcus faecium*, *Lactobacillus fermentum*, *Lactobacillus casei*, and *Lactobacillus plantarum*.

A blend of essential, soluble vitamins required for stressed birds.

A blend of soluble minerals, targeting those required by the immune system.

Citrus flavor promotes water consumption

KEY POINTS:

- Stimulates water and feed intake under stressful conditions.
- Readily water soluble.
- Safe and 'Natural'
- Comprehensive and economical treatment for heat stress

DIRECTIONS FOR USE:

Standard recommendations to implement Avi-Lyte™.

For a minimum of 5-7 consecutive days at the following rates:

- Turkeys: Mix 8 oz (0.5 lb) of Avi-Lyte™ per gallon of stock solution. Meter at 1 oz of stock solution per gallon of drinking water. 8 oz (0.5 lb) of Avi-Lyte™ treats 128 gallons of water.
- Broilers, Pullets, Egg layers and Breeders: Mix 8 oz (0.5 lb) of Avi-Lyte™ per gallon of stock solution. Meter at 1 oz of stock solution per gallon of drinking water. 8 oz (0.5 lb) of Avi-Lyte™ treats 128 gallons of water.

For best results use warm water when mixing stock solution.

AVAILABLE SIZES:

0.5 lb. foil packages

2.5 lb. foil packages
