

HYVAR[®] X-L IVM

ALLIGARE.COM

ELEVATE YOUR EXPECTATIONS WITH THIS HISTORICALLY PROVEN, BARE-GROUND HERBICIDE

Alligare's Hyvar X-L provides extended, broad-spectrum control of undesirable vegetation.

PERFORMANCE HIGHLIGHTS

- Long-lasting residual
- Consistent control of annual and perennial grasses, broadleaf weeds, and brush
- Excellent on many tough-to-control grasses, such as Bermudagrass, Quackgrass, and Johnsongrass
- Can be applied under asphalt and concrete pavement in industrial areas

FOR BEST RESULTS

1. Best results are obtained when rainfall occurs within two weeks following application.
2. Optimal weed control is achieved when Hyvar X-L is applied as a pre-emergent, prior to germination.
3. For post-emergent control of perennial species, Hyvar X-L should be tank-mixed with a systemic, foliar-absorbed herbicide, such as glyphosate.

USE SITES

- railroad rights-of-way
- under asphalt and concrete pavement
- pipelines
- petroleum tank farms
- storage areas
- industrial sites

NOTE: Hyvar X-L should not be applied in, or around, sensitive areas where valued vegetation is adjacent to the bare-ground site. Do not apply Hyvar X-L within the root zone of desirable plants and tree species.

HYVAR X-L IVM

ACTIVE INGREDIENT: BROMACIL 2 LBS/GAL

TARGETED WEEDS

Cheat
Crabgrass
Foxtail

Bahiagrass
Bermudagrass
Johnsongrass

Quackgrass
Puncturevine
Ragweed

Dogfennel
Broomsedge
Wild carrot

MIXING INSTRUCTIONS

1. Fill the tank 1/4 to 1/3 full of water.
2. If tank mixing this product with other labeled herbicides, add dry formulations first, followed by Hyvar X-L and other liquid flowables, then emulsifiable concentrates.
3. Add any surfactants.
4. Agitate during the final filling of the spray tank, and maintain sufficient agitation during application, to ensure uniformity of the spray mixture.

ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS
