

CV DRY VIN

Vinegar Replacement

For Poultry & Animal Use

CV DRY VIN is a dry form of acetic acid that is recommended for use in poultry and animal drinking water in place of vinegar. **CV DRY VIN** will not damage equipment.

USAGE: Mix one to two 1 oz. scoops **CV DRY VIN** to each gallon of water of stock, mix well, introduce to drinking water with automatic proportioner at the rate of 1:128. For best results, use daily. To use as a line cleaner mix 24 to 48 ounces to each gallon of stock solution, inject into water line at 1:128, activate nipples and let stand for at least 12 hours. Flush with high pressure

WARNING

CV DRY VIN should not be mixed with chlorine bleach, and proper eye protection should be worn when mixing. In case of contact with eyes or skin flush with plenty of water. **KEEP OUT OF REACH OF CHILDREN.**
