preservative. Supplied in 100 mL viials. 25 mg/mL: Special baby pig concentration. Each mL contains lincomycin hydrochloride equivalent to lincomycin, 25 mg; also Benzy1 Alcohol, 9.45 mg added as preservative. Supplied in 100 mL viials.

**Lincomycin Injectable**

**Indicated for the treatment of arthritis caused by susceptible organisms and for mycoplasma pneumonia.**

**Warning:** Not for human use. Deep in the muscular tissue. Should not be administered within 48 hours of latest treatment.

**Lincomycin Injectable**

**Branded Lincomycin Injections Injectable**

For Intramuscular Use in Swine Only

Lincomycin Injectable contains lincomycin hydrochloride, an antibiotic produced by Streptomyces lincolnensis var. lincolensis, which is chemically distinct from all other clinically available antibiotics and is isolated as a white crystalline solid.

**INDICATIONS FOR SWINE**

Lincomycin injectable is indicated for the treatment of infectious strains of arthritis caused by organisms sensitive to its activity. This includes most of the organisms responsible for various joint infections in swine, such as staphylococcus, streptococcus, Erysipelothrix and Mycoplasma spp.

**CONTRAINDICATIONS**

As with all drugs, the use of Lincomycin Injectable is contraindicated in animals previously found

**Dosage and Administration**

For arthritis or mycoplasma pneumonia: 5 mg per pound of body weight intramuscularly once daily for three to seven days as needed. When using Lincomycin Injectable containing 25 mg/mL, 1 mL/5 lb. body weight will provide 5 mg/lb.

When using Lincomycin Injectable containing 100 mg/mL, 1 mL/20 lb. body weight will provide 5 mg/lb. When using Lincomycin Injectable containing 300 mg/mL, 1 mL/100 lb. body weight will provide 5 mg/lb.

For optimal results, initiate treatment as soon as possible. As with any multi-dose vial, practice aseptic techniques in withdrawing each dose. Adequately clean and disinfect the vial closure prior to entry with a sterile needle and syringe. No vial closure should be entered more than 20 times.

**HOW SUPPLIED**

Lincomycin Injectable is available in three concentrations: 300 mg/mL, 100 mg/mL, and 25 mg/mL.

300 mg/mL: For use in swine weighing 300 pounds or more. Each mL contains lincomycin hydrochloride equivalent to lincomycin, 30 mg; also Benzy1 Alcohol, 9.45 mg added as preservative. Supplied in 100 mL viials.

100 mg/mL: Each mL contains lincomycin hydrochloride equivalent to lincomycin, 100 mg; also Benzy1 Alcohol, 9.45 mg added as

**WARNING**

Swine intended for human consumption should not be slaughtered within 48 hours of latest treatment. Not for human use.

**CAUTION**

If no improvement is noted within 48 hours, consult a veterinarian.

**ADVERSE REACTIONS**

The intramuscular administration to swine may cause a transient diarrhea or loose stools. Although this effect has rarely been reported, one must be alert to the possibility that it may occur. Should this occur, it is important that the necessary steps be taken to prevent the effects of dehydration.

**DOSAGE AND ADMINISTRATION**

For arthritis or mycoplasma pneumonia-5 mg per pound of body weight intramuscularly once daily for three to seven days as needed. When using Lincomycin Injectable containing 25 mg/mL, 1 mL/5 lb. body weight will provide 5 mg/lb.
