

R-Pen™

Penicillin G Potassium

Soluble powder for use in drinking water

- Conveniently packaged for ease of use
- Packaged in two sizes:
0.384 Billion Unit (B.U.)
0.500 Billion Unit (B.U.)
- One day withdrawal in turkeys

Composition:

Penicillin G potassium antibiotic powder

Indications/Dose:

- For treatment of erysipelas in turkeys caused by *Erysipelothrix rhusiopathiae*
- Administer orally at a dosage of 1,500,000 units of penicillin per gallon (3.8 liter) of drinking water for five consecutive days
- For best mixing, prepare a concentrated solution by combining contents of entire package and approximately 20 ounces (1 1/2 pints) of water in a glass or plastic container
- Stir to dissolve. Allow the concentrated solution to stand until the foam disappears
