ACTIVE INGREDIENT: SODIUM HYPOCHLORITE .............................................................................. 10%
OTHER INGREDIENTS .......................................................................................... 90%

FIRST AID STATEMENT

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes. 
- Remove contact lenses, if present and easy to remove, then continue rinsing eye.

IF INHALED:
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING:
- Call a poison control center or doctor for further treatment advice.
- Give 200 ppm solution for two minutes.

PROCESSING, FOOD SERVICE, AND WATER TREATMENT INDUSTRIES.

VERTEX CSS-10 STORAGE:
After cleaning & potable water rinse, and before use, sanitize all nonporous surfaces with 200 ppm VERTEX CSS-10 for two minutes. Rinse all surfaces with a 200 ppm available chlorine solution. Do not rinse. See Table of Proportions. Surfaces must be dry before contact.

SANITIZATION OF POROUS FOOD CONTACT SURFACES:
Sanitization by hot water rinse may be used by all processors. For processors that select hot water rinse as their method of sanitization, use 200 ppm available chlorine solution for 2 minutes.

SANITIZATION OF NONPOROUS NON-FOOD CONTACT SURFACES:
See Table of Proportions. Surface must be dry before contact.

SANITIZATION OF NONPOROUS FOOD CONTACT SURFACES:
Sanitize all nonporous surfaces with 200 ppm VERTEX CSS-10 for two minutes. Rinse all surfaces with a 200 ppm available chlorine solution. Do not rinse. See Table of Proportions. Surfaces must be dry before contact.

RESTAURANTS AND TAVERNS –
Those stated above. The compounds must always be used at dilutions (see table of proportions) and according to applicable directions provided on the EPA registered label. Do not re-use solution. Provide fresh solution for each application. Do not use in association with other sanitizing agents.

SANITIZATION OF POROUS NON-FOOD CONTACT SURFACES:
Sanitize by hot water rinse or cold water rinse if not possible due to time. Gross food particles and soil must be removed by pre-flush or pre-scrape as necessary prior to sanitization. Sanitize all nonporous surfaces with 200 ppm VERTEX CSS-10 for two minutes. Rinse all surfaces with a 200 ppm available chlorine solution. Do not rinse. See Table of Proportions. Surfaces must be dry before contact.

SANITIZATION OF DAIRY PROCESSORS –
Sanitize all nonporous surfaces with 200 ppm VERTEX CSS-10 for two minutes. Rinse all surfaces with a 200 ppm available chlorine solution. Do not rinse. See Table of Proportions. Surfaces must be dry before contact.

SANITIZATION OF COMMERCIAL LAUNDRY SANITIZERS –
Wet fabrics or clothes should be spun dry prior to sanitization. Thoroughly mix 200 ppm of VERTEX CSS-10 available chlorine solution with hot water in the washing machine. Use 200 ppm solution for two minutes.

EGG SANITIZING:
Immerse all halters, ropes and other types of equipment used in handling and restraining poultry in the sanitizing solution. Eggs should then be rinsed with potable water before being processed. Feed racks, mangers, troughs, automatic feeders, fountains and waterers must be rinsed with potable water before reuse.

STATE AND LOCAL REGULATIONS -
Consult your dealer, state or local health authorities for additional information.

EFFECTIVE USE:
- Use with 200 ppm available chlorine solution for two minutes.
- Do not exceed 130˚F. 4. Allow the eggs to thoroughly dry before casing or breaking. 5. Never reuse sanitizing/washing solution.

NOTE:
- Test the level of available chlorine, if solution has been allowed to stand. Add more of this product if the available chlorine is below 100 ppm. Do not test with a test strip or kit at this concentration. Follow the directions on the package to prepare the solution.

CAUTION:
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams or other bodies of water. Discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant. Compounds containing hypochlorite may be used to sanitize equipment associated with food or food products. A potable water rinse is required following use of these compounds under conditions other than those stated above.

STORAGE & DISPOSAL:
- Store in a cool, dry, well ventilated area, away from food and feed.
- Do not allow to become contaminated by contact with soil or organic matter.
- Keep container tightly closed to avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

DIRECTIONS FOR USE

Do not apply this product through any type of insecticide sprayer.
