

### Activo Liquid

Activo Liquid is a standardized composition of selected secondary plant compounds and organic acids. The specific mixture of flavoring substances act synergistically by stimulating the secretion of digestive juices and stabilizing the microflora in the gastrointestinal tract. These effects result in improved overall animal performance.

### Your Benefits

Modern turkey breeds react very sensitively to stressors in diverse situations of the life cycle. Performance will be negatively influenced by any challenges and environmental changings. A proactive support by giving a specific mixture of flavoring substances can improve digestion and therefore enhance turkey performance during critical phases.

### Recommendation

Dosing recommendation for 1:128 water dosing system:

Period	Situation	Duration	Volume per gal Stock solution
1	At time of transfer from brood to grower barn	2 days before + 2 days after	4 - 8 oz
2	Weekly pulse dose	1 - 2 days per week	4 - 8 oz
3	In anticipated or during times of challenges	2 - 4 days	4 - 8 oz

Recommended for use during periods of challenge.

Flexible Application via water for drinking.
