

Water APP Boost

Used to supplement and boost
Bacillus to the birds

Use **prior to an anticipated challenge**
or secondary bacterial infection.

Directions for use:

- Mix BOOST in the drinking water line and use within 6 hours
- 50g bag of BOOST treats 10,000 birds
- Repeat as needed

*Water used to make stock solution should contain no disinfectants or antibiotic residue

Examples:

- Prior to a necrotic enteritis challenge in broilers
- Post HE vaccination

Water APP Promote

Used to colonize or reestablish homeostasis
in the GIT with lactic acid bacteria

Use as an aid to **RESTORE gut flora post antibiotic treatments, copper therapy or after periods of stress** to combat dysbacteriosis.

Directions for use:

- Mix PROMOTE in the drinking water line and use within 6 hours
- 50g bag of PROMOTE treats 10,000 birds
- Repeat as needed

*Water used to make stock solution should contain no disinfectants or antibiotic residue

Examples:

- Early colonization in chicks
- Post therapeutic antibiotic use
