

SaniDate®

Sanitizing Wipes

Through the power of activated peroxide, SaniDate Sanitizing Wipes will kill 99.9% of bacteria in its path, including *Staph* and *Klebsiella*. SaniDate works to destroy bacterial cells from the inside out - peroxyacetic acid punctures the cell wall allowing the hydrogen peroxide to melt the cell from within without the use of harsh chemicals.

SaniDate Sanitizing Wipes require no rinsing or scrubbing to facilitate complete sanitation of hard surfaces.

- ▼ EPA-approved
- ▼ Chlorine and ammonia-free formula
- ▼ Works on contact to kill bacteria
- ▼ Chemistry biodegrades into oxygen and water leaving no harmful residue

Active Ingredient

Hydrogen peroxide
