

CyKill™ rodenticide bait

CyKill™ Rodenticide Bait combines superior palatability with the proven active ingredient Bromethalin to control Norway rats, roof rats, house mice and meadow voles in areas where competing food or feed sources are present.

The food-grade ingredients in CyKill Rodenticide Bait provide an excellent base for superior palatability, and its Bromethalin active is an effective non-anticoagulant rodenticide capable of killing rats and mice and meadow voles in a single feeding. The meal bait product offers superior rodent acceptance as it contains food-grade ingredients which provide rodents a variety of textures and flavors.

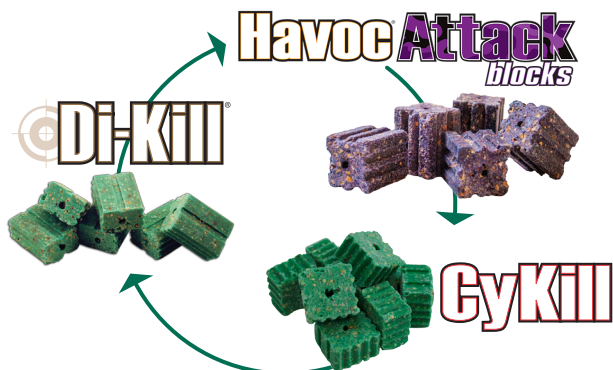

CyKill Rodenticide Bait

- High palatability bait form for effective indoor and outdoor rodent control
- Acute, single-dose rodenticide containing the active ingredient, 0.01% Bromethalin
- Rodents may consume a lethal dose in a single-night's feeding, with the first dead rodents appearing 2 days after feeding begins
- Stop feed action
- Kills House Mice, Norway Rats, Roof Rats and Meadow Voles
- Very attractive bait for rodent control when other feed sources are available
- For use in and around buildings and structures and inside burrows
- Use as a supplement to Neogen's current Rotational Baiting Strategy- during periods of heavy rodent infestation

Available in 4lb jug and 12lb pail
