

MAINTAIN GUT HEALTH.

#ScienceHearted

Get ahead of health challenges and secondary bacterial infections.

Give your birds the *Bacillus* boost they need with CERTILLUS Prep H₂O.

What if you could target both Necrotic Enteritis (NE) and avian pathogenic *E. coli* (APEC) while improving average daily gain and feed conversion?

What if you could return the gut to a normal microbial homeostasis even after a challenge?

Help your birds be prepared for health challenges while maintaining water intake with CERTILLUS™ Prep H₂O.

Mix PREP H₂O in the drinking water line and use within 6 hours

Run one full dose of PREP H₂O per day for 3 days leading up to an expected challenge

For general health, run on Days 7, 14 and 21

Water used to make the stock solution should NOT contain disinfectants or antibiotic residue

Improve gut health by combating microbial imbalance.

Use the *Lactobacillus* in LACTILLUS Revive H₂O to maintain a healthier gut microbiota.

What if you could combat dysbacteriosis?

What if you could reestablish gut microbiota after antibiotic treatment?

Help your birds' GI tracts return to normal health after periods of stress, antibiotic treatment or copper therapy that are known to wreak havoc on the gut with LACTILLUS™ Revive H₂O.

Mix REVIVE H₂O in the drinking water line and use within 6 hours

Flush into the line immediately prior to chicks arriving and a partial flush 4 hours after birds arrive

Water used to make the stock solution should NOT contain disinfectants or antibiotic residue

Recommended Schedule

<u>DAY</u>	<u>PRODUCT</u>	<u>NOTE:</u> Products should be mixed in with the amount of stock water that allows for bird consumption in six hours. Flush water lines before adding product to water.
1-2	REVIVE	
7	PREP	
10	REVIVE	
14	PREP	
21	PREP	

Storage Information

- For ideal **long-term storage**, product should be kept refrigerated.
- For **short-term storage**, product can be kept below 75 degrees.
