

PROSPERO™ - LIQUID

Prospero™ is an everyday natural water additive that stimulates appetite, enhances growth, strengthens immunity and reduces the effects of oxidative stress and viral challenges.

Helps Overcome:

- | | | |
|--|--|--|
|  Ration Changes |  Disease Pressure |  Heat Stress |
|  Poor Appetite |  Placement |  Common Bacterial Pathogens |

WHAT'S INSIDE:

PATENTED MICROFUSED® ESSENTIAL OILS

Naturally promotes gut health and helps reduce pathogen load through broad spectrum antimicrobial activity. Outstanding antioxidant capacity results in less oxidative stress and more energy for production.

ACTIFIBE® PREBIOTIC

Feeds beneficial bacteria in the gut to promote competitive exclusion and boost immune function allowing the bird to use energy for meat deposition, egg laying and reproduction.

BENEFITS OF PROSPERO

- **An economical and proven alternative** to conventional AGP programs.
- **Stimulates both water and feed consumption**, helping birds reach day of age weights faster.
- **Beneficial as an adjunct** to coccidiosis vaccination programs when used from day 1 through the life of the flock.
- **Synergized phenolic, terpene and aldehyde** modes of action combine to destroy bacterial cell walls, thus reducing pathogen loads for common bacterial pathogens of concern such as *Clostridium perfringens*, *E. coli* and others, without the risk of antimicrobial resistance.

THE DIFFERENCE

Powered by **Ralco** technologies, **ProsperEO** is a synergistically balanced blend of origanum (oregano), thyme white and cinnamaldehyde essential oils with a proprietary prebiotic fiber.

POWERED BY

U.S. PATENT NO. 10,512,664

ProsperEO maintains its integrity due to microencapsulation of active ingredients within the oil droplets via our proprietary and patent pending microfusion process. **Microfused Essential Oils** have smaller, more uniform droplets that stay stable over time and temperature. Protected droplets get where they are needed to facilitate and maintain intimate contact.

Competitor Oil:

Larger oil droplets in competitive oil products coalesce and become unstable

Microfused Essential Oils:

20 times greater surface area; 100 drops per 1 drop of competitor

Control

Microfused Essential Oils

These micrographs demonstrate the increased strength of the villi, which directly contributes to greater nutrient absorption.

POWERED BY

Beneficial bacteria multiply when they feed on **Actifibe** crowding out pathogens for improved health and performance.

Actifibe Promotes Beneficial Bacteria

Research conducted by Purdue University

PROSPEROO LIQUID

Product# 2751-1G
1 gallon Jug

PROSPEROO LIQUID OMRI

Product# 2753-1G
1 gallon Jug

RECOMMENDED USE:

Use at a low level (1-3 oz.) continually to maintain gut health. During times of stress or disease challenge use at a higher level (3-5 oz.) on an "as needed" basis.

FOR POULTRY:

Mix at the following rate with 1 gallon of water to make stock solution.

Meter 1 oz. of stock solution per gallon of drinking water (1:128).

Broilers 1-5 oz.
Pullets/Layers 1-5 oz.
Turkeys 1-5 oz.
