

Tread Defense

Tread Defense is made from naturally occurring ingredients. The biodegradability is rapid and it is broken down into the following components: oxygen, water and soda ash. **Tread Defense's** effectiveness coupled with its rapid decomposition into non-toxic substances make it the ideal way to clean with minimum effects on the surrounding environment. **Tread Defense** is effective and more environmentally friendly than other bleach chemicals that could be used in their place.

CVE is committed to producing safe, innovative and reliable products for the future.

DIRECTIONS & PROTECTIVE MEASURES:

Add 1/2" thick layer of powder evenly withing the foot pan. Keep powder free of organic matter and replace every 2 weeks. Keep container tightly closed when storing. Always refill foot pan in a well ventilated area while wearing appropriate PPE.
