

# TEKKO® 10

## Insect Growth Regulator Concentrate

TEKKO 10 is a larvicide for the control of listed pests in livestock premises and poultry operations. Novaluron, the insect growth regulator (IGR) in TEKKO 10, prevents the immature stages (larvae) of insects from developing into adults.

### Active Ingredient

Novaluron 9.3%

### Use Sites

Cattle Barns, Hog Houses, Horse Barns, Incinerators, Livestock Feed Trough Areas, Livestock Manure, Livestock Premises, Non-Farm Animals Stalls, Poultry Buildings, Cage-layer houses, Poultry Houses, Refuse Storage Areas

### Effective Against

Flies, House Flies, Stable Flies, Blow Flies, Face Flies, Horn Flies, Lesser House Flies, Soldier Flies. Darkling Beetles (Litter, Hide and Carrion Beetles), Sand Flies, and Dump Flies

### Packaging

6 x Quart (45 cases/pallet)

4 x Gallon (36 cases/pallet)

### Tekko 10 Benefits

- Disrupts the life cycle of listed insects, preventing them from developing into adults.
- Can be used indoors and outdoors
