

## BEETLE CONTROL THAT'S AHEAD OF THE CURVE

### A Ready-To-Use, Fast-Acting<sup>1</sup> Insecticide

Conquest™ helps control darkling beetles with a first-of-its-kind solid bait formula that offers consistency and rapid results<sup>1</sup>.

Conquest is a fast-acting<sup>1</sup> product for heavy beetle challenges as well as a maintenance program when beetle loads are moderate and low.

Conquest also gives custom applicators and turkey and conventional broiler operations an additional spinosyn application option to reduce the potential of insecticide resistance. This leading-edge product is backed by Elanco's service, expertise and leadership in insecticides.

Confidence raised.

Poultry

# A Proven Insecticide in an Innovative Form

Conquest is a food-grade tablet in the spinosyn chemical class that requires no restricted-use applicator license. Adult beetles begin feeding on Conquest within minutes of application with 100% mortality at 24 hours. Each tablet lasts approximately 35 days.<sup>2</sup> Conquest provides another option to control darkling beetles, giving Elanco the most complete portfolio in the industry to help meet customers' Integrated Pest Management (IPM) needs.

## Mode of Action

Spinosad targets darkling beetles through a unique mode of action. When the beetle ingests part of the tablet, a neural mechanism causes binding sites on nicotinic acetylcholine receptors (nAChRs) of the insect nervous system, leading to disruption of acetylcholine neurotransmission. It kills beetles by hyperexcitation of the nervous system.

## Ease of Application

Conquest's unique formulation also makes application easier.

### APPLICATION OPTIONS

For more consistent results, Conquest allows application as close to bird placement as possible. Conquest can be applied under the feed lines using a trailer-mounted seeder or by hand dropping the tablets. To ensure correct application, always follow the label directions.

*Darkling beetles tend to gather around feed lines where there is food, heat and moisture. Brood chambers tend to have the highest populations.*

**The label contains complete use information, including cautions and warnings. Always read, understand and follow the label and use directions.**
