

# ProPhorce™ SR 710

Unrivaled butyric acid power for water

## Product Description

Butyric acid has been demonstrated to exert multiple roles to gut health and support animal welfare. Finding ways to prevent its absorption before reaching the intestine and control its unpleasant smell has been a challenge for decades.

ProPhorce™ SR 710 consists of monoglycerides of butyric acid in a liquid form. Water application allows for greater flexibility and strategic application at any time along the production cycle.

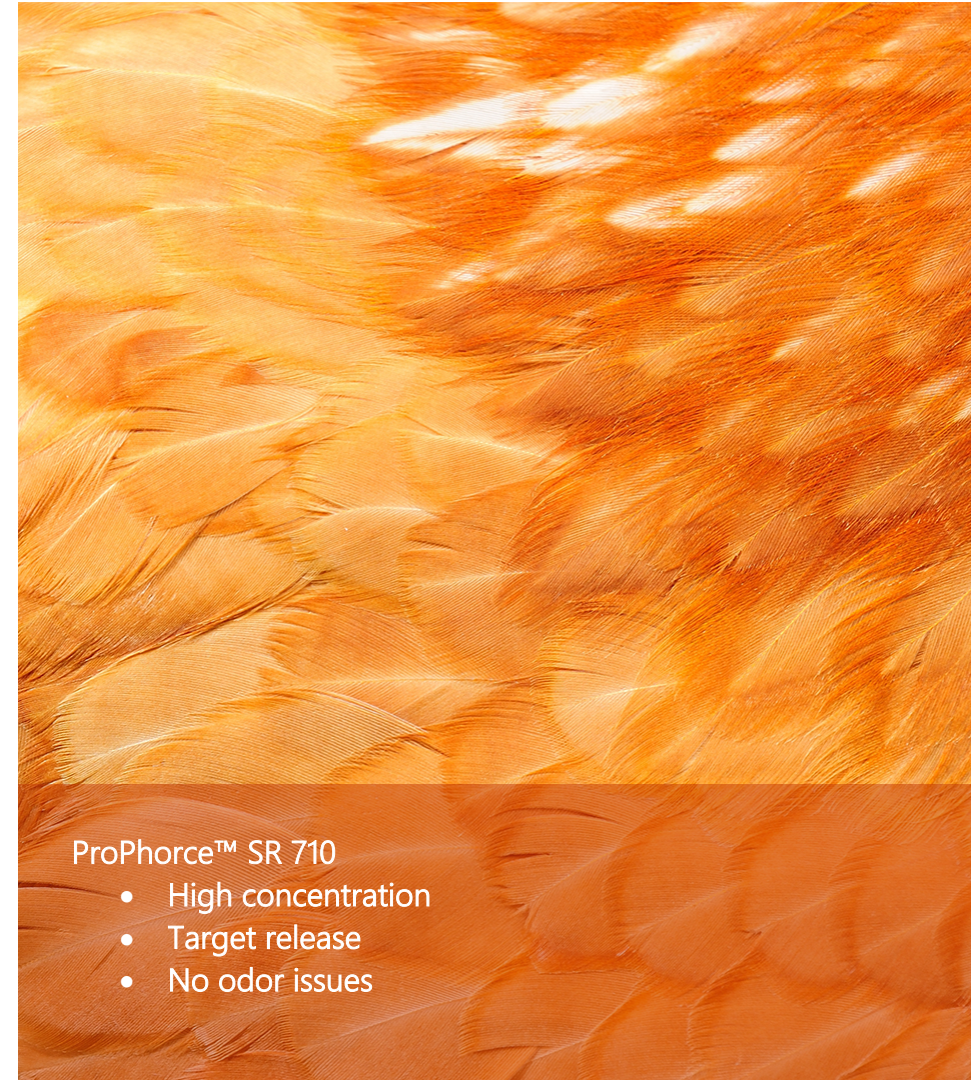

25 years of experience in esterification provides Perstorp with a standout position with regards to knowhow in production and product application.

## Segment Applications

Application in water

## Delivery Forms

5 kg can  
25 kg can  
200 kg drum  
1000 kg IBC

### ProPhorce™ SR 710

- High concentration
- Target release
- No odor issues

# ProPhorce™ SR 710

Unrivalled butyric acid power for water

## ProPhorce™ SR 710

No dangerous goods restrictions on transport and storage

Produced in a GMP+ approved site

GMO Free

Odorless

Feed material

Liquid product

## Handling and Safety

See SDS for details

Clean and flush water lines on a regular basis. Don't use for more than 10 days without flushing

## Storage and stability

Storage: See SDS for details

Shelf life: Stable for 24 months after production date.

HS N°: 291560

Effective date: December 27, 2021
