

TECHNICAL SHEET

Avaplex™ is a carefully selected and cultivated blend of species-specific microencapsulated probiotics, antibodies of natural origin extracted from dehydrated egg, high quality proteins, and prebiotics that is infused with oregano essential oil. Recommended to naturally provide immune support for all classes of avian species.

As part of the Agrablend™ line, Avaplex™ contains a source of live, viable naturally occurring microorganisms.

Guaranteed Analysis	
Lactic acid producing bacteria total (min) ¹ <ul style="list-style-type: none">• Enterococcus faecium• Lactobacillus acidophilus	280,000,000 CFU ² /g
Crude protein	(min) 4.0%
¹ Microencapsulated; ² cfu=colony-forming unit Please refer to product label for full list of ingredients.	

Feeding Recommendations:

Intended for use in the presence of early life stressors or as needed for production-based challenges. Inclusion via drinking water or mixed whole ration
Refer to product label for detailed feeding inclusion rate

Physical Characteristics:

Color: off white/light yellow
Form: powder
Appearance: free-flowing powder
Odor: oregano
Solubility: water soluble
pH: not available
Shelf life: 2 Years
Refer to SDS for more information

Packaging Options:

HDPE recyclable plastic:

- 1kg jar
- 5kg bucket
- 12 kg bucket

Agranco's Agrablend™ line of feed additives is specifically designed to enhance the microflora environment and influence critical functions of the intended species' gastrointestinal tract. Our formulas are customized for specific applications within an intended species and utilize different combinations of premium ingredients: enzymes, cultivated yeast, species-specific prebiotics, probiotics and naturally derived antibodies, all infused with essential oils.

This pin-pointed approach provides positive direct and indirect effects that offer rapid immune support and optimize animal performance. These sustainable, symbiotic blends provide an effective and safe alternative for pathogen control and improved feed utilization, reducing environmental strains.

Our mission with our intentional formulations is to provide a natural alternative for production optimization that keeps the producer, consumer, and animal's wellbeing in mind. What sets the Agrablend™ line apart is the precise balance of proven ingredients that function in synergism to take the guesswork out of mixing micro-supplements. The good actions of feeding Agrablends today, make for a significant impact and a better tomorrow.
