

NUTRIPLEX-W™

NutriPlex-W™ is a carefully selected and cultivated, completely water-soluble blend of species-specific microencapsulated probiotics, live active yeast, enzymes, and prebiotics that is infused with oregano essential oil. Recommended to naturally support optimal performance and overall animal health via drinking water, NutriPlex-W is intended for use in all classes of avian species.

As part of the AgraBlend™ line, NutriPlex-W™ contains a source of live, viable naturally occurring microorganisms.

GUARANTEED ANALYSIS

Total lactic acid producing bacteria (min)¹.....	20 million CFU²/g
(Enterococcus faecium, Lactobacillus acidophilus)	
Saccharomyces cerevisiae (min).....	750 million CFU²/g
alpha Amylase (Aspergillus oryzae).....	3750 µg starch hydrolyzed/min/g
Protease (Aspergillus oryzae).....	500 µg proteins hydrolyzed/min/g
Cellulase (Aspergillus niger).....	200 µg cellulose breakdown/min/g
Lipase (Aspergillus oryzae).....	150 µg triglycerides hydrolyzed/min/g
Pectinase (Aspergillus niger).....	100 µg pectin breakdown/min/g
Xylanase (Aspergillus oryzae).....	1100 µg xylans hydrolyzed/min/g

¹Microencapsulated, ²CFU=colony forming unit

INGREDIENTS: Maltodextrins, Dried Aspergillus oryzae fermentation extract, Dried Aspergillus niger fermentation extract, Active dry yeast, Oregano, Dried Enterococcus faecium fermentation product, Dried Lactobacillus acidophilus fermentation product, Fructooligosaccharides.

STORAGE AND HANDLING: Store in a cool, dry area under roof, away from direct sunlight for maximum stability. For animal use only. Not for human consumption. Keep out of reach of children.

FEEDING RECOMMENDATIONS:

Commercial Drinking Water Applications:

150g to 250g per 10,000 birds supplemented as a daily additive mixed in avian drinking water systems. One, included 236.58cc/1 cup/ 8 oz. scoop holds approximately 100g of product. Adjust medicator and solution tank volumes to appropriately supplement daily recommendations based on water intake and number of birds. Water solution should be consumed within 48 hours of mixing for optimal effectiveness.

Backyard Drinking Water Applications:

Directly mix 12g per 20 liters (5.28 gallons) of drinking water and administer as daily additive. Water solution should be consumed within 48 hours of mixing for optimal effectiveness.
