

NUTRIPLEX-W™

Optimal Performance

AGRABLEND™

TECHNICAL SHEET

Nutriplex-W™ is a carefully selected and cultivated, completely water-soluble blend of species-specific microencapsulated probiotics, live active yeast, enzymes, and prebiotics that is infused with oregano essential oil. Recommended to naturally support optimal performance and overall animal health via drinking water, Nutriplex-W is designed to be safe on poultry house water equipment and is intended for use in all classes of avian species.

As part of the Agrablend™ line, Nutriplex-W™ contains a source of live, viable naturally occurring microorganisms.

Guaranteed Analysis

Lactic acid producing bacteria total (min) ¹ <ul style="list-style-type: none">• Enterococcus faecium• Lactobacillus acidophilus	20,000,000 CFU ² /g
Saccharomyces cerevisiae	750,000,000 CFU ² /g
alpha Amylase (Aspergillus oryzae)	3750 µg starch hydrolyzed/min/g
Protease (Aspergillus oryzae)	500 µg proteins hydrolyzed/min/g
Cellulase (Aspergillus niger)	200 µg cellulose breakdown/min/g
Lipase (Aspergillus oryzae)	150 µg triglycerides hydrolyzed/min/g
Pectinase (Aspergillus niger)	100 µg pectin breakdown/min/g
Xylanase (Aspergillus oryzae)	1100 µg xylans hydrolyzed/min/g
¹ Microencapsulated; ² cfu=colony-forming unit Please refer to product label for full list of ingredients.	

Physical Characteristics:

Color: light brown
Form: powder
Appearance: free-flowing powder
Odor: oregano
Solubility: water soluble
Shelf life: 2 Years
Refer to SDS for more information

Packaging Options:

HDPE recyclable plastic:

- 6kg bucket

Feeding Recommendations:

Intended for everyday use.
Inclusion via drinking water.
Refer to product label for detailed inclusion rate.

Agranco's Agrablend™ line of feed additives is specifically designed to enhance the microflora environment and influence critical functions of the intended species' gastrointestinal tract. Our formulas are customized for specific applications within an intended species and utilize different combinations of premium ingredients: enzymes, cultivated yeast, species-specific prebiotics, probiotics and naturally derived antibodies, all infused with essential oils.

This pin-pointed approach provides positive direct and indirect effects that offer rapid immune support and optimize animal performance. These sustainable, symbiotic blends provide an effective and safe alternative for pathogen control and improved feed utilization, reducing environmental strains.

Our mission with our intentional formulations is to provide a natural alternative for production optimization that keeps the producer, consumer, and animal's wellbeing in mind. What sets the Agrablend™ line apart is the precise balance of proven ingredients that function in synergism to take the guesswork out of mixing micro-supplements. The good actions of feeding Agrablends today, make for a significant impact and a better tomorrow.
