

DIVERT INSECT REPELLENT™ AG

SELL SHEET

Tired of being distracted by flying insects?

Whether you are driving, working or just trying to relax, there is nothing more annoying and distracting than the buzzing of flying insects whipping by your head. Flying insects are quick and it takes concentration to swat them, which can be dangerous if you are driving or using equipment.

Divert Insect Repellent™ AG diffusers are designed to repel flying insects from entering or staying in areas where they are deployed. Formulated with Cupressus sempervirens (Mediterranean Cypress Oil) and other essential oils. Diffuser naturally releases the essential oil blend and creates an area that flying insects prefer to avoid.

Divert Insect Repellent™ AG is designed to be used as easily as an air freshener. You don't have to spray it or plug it in, just hang it up and let it create a fly free zone for you.

Divert Insect Repellent™ AG can be used in vehicles, farm equipment, work areas, breakrooms, entryways, restaurants, homes, food processing, campers, tents, deer stands or any other area you want to repel flying insects. One diffuser covers up to 2000 cubic feet and lasts up to 60 days.

Divert Insect Repellent™ AG Use Directions:

1. Unscrew cork cap and remove plastic insert from neck of diffuser. Screw cork cap back on bottle.
2. The cork cap will slowly diffuse the repellent throughout the area.
3. For heavier areas of infestation, invert diffuser and return to upright position quickly, the diffuser will saturate the cork cap for faster diffusion and dispersal.

Divert Insect Repellent™ AG

1 x 5ml Diffuser covers up to 2,000 cu. ft.

12 x 5ml Diffusers per case
